

DRY EYE TESTING FORM

CIRCLE OF LIFE EYECARE CENTER

WHAT IS DRY EYE DISEASE?

Dry eye disease is a common condition that occurs when your tears aren't able to provide adequate lubrication for your eyes. Tears can be inadequate and unstable for many reasons. For example, dry eyes may occur if you don't produce enough tears or if you produce poor-quality tears. This tear instability leads to inflammation and damage of the eye's surface.

SYMPTOMS OF DRY EYE

- PAINFUL TO WEAR CONTACTS
 - BLURRED VISION
 - EYE IRRITATION/BURNING
 - TEARING CONSISTENTLY
 - RED EYES
-

HOW DO WE EVALUATE DRY EYE?

We test for dry eye through different analyses that include:

- ADVANCED ANALYSIS OF TEAR FILM
- MEIBOGRAPHY SCAN
- FLUORESCEIN IMAGING

THESE TESTS HELP THE DOCTOR DETECT ANY OCULAR SURFACE CHANGES ASSOCIATED WITH THE INSUFFICIENT TEAR FILM. ALONG WITH ANALYZING TEAR QUANTITY AND QUALITY THESE EXAMINATIONS HELP PINPOINT THE ROOT OF THE ISSUE.

EACH INDIVIDUAL TEST IS PRICED AT \$45.00 EACH, BUNDLE DISCOUNT AVAILABLE FOR TWO OR MORE TESTS.

TESTS MAY BE COVERED BY MEDICAL INSURANCE.

Here at Circle of Life Eyecare Center, we value each patient's commitment to the health and wellbeing of their eyes. By electing to take these tests, you are making a conscious effort to be a step ahead of any future eye problems that might arise in your life.
