

# Functional Vision Testing

These three tests use cutting-edge, newly FDA approved eye-tracking technology created by RightEye. We here at Circle of Life are one of only handful of offices in the state that provide access to this new diagnostic tool. A major benefit of these tests is that customized at-home training plans are prescribed based on your individual results and these trainings are proven to improve vision dysfunctions in as little as 10 minutes a day.

Functional Vision EyeQ \$35

### What does it test for?

The goal of this test is to detect dysfunctions in how your eyes work together to focus on and follow objects. Weak ocular muscles, delayed nerve signals, and several other seemingly minor issues can affect visual clarity and focus.

### Why should I be tested?

There are several eye dysfunctions that are missed in routine eye exams that cause issues that cannot be corrected by eyewear alone. This test provides insight into if and what issues may be present.

Reading EyeQ \$35

### What does it test for?

The main purpose of this test is to determine if there is an eye dysfunction contributing to your reading or learning difficulties. Even with 20/20 vision, reading can be challenging if there are other issues present.

### Why should I be tested?

Even with corrected vision, some eye dysfunctions make learning and reading a struggle. This leads to eye strain, headaches, and a lot of frustration. This test helps determine what is wrong and how to correct it.

Sports Vision EyeQ \$35

### What does it test for?

By combining elements of the functional vision test with unique tests for determining how the athlete detects changes in movement and light, this test can determine how well an athlete is seeing in-game.

### Why should I be tested?

Over 80% of sensory input in sports is visual and 20/20 vision doesn't always mean you're at your best in terms of motion tracking and reflexes. Any athlete who wants to step up their game should take this test and try the at-home trainings to improve their sports vision.

- Yes, I would like to receive the most comprehensive eye exam available today and get all three tests done today for the package *discount price of \$85*
- Yes I am concerned with my vision, but I would only like to do the Functional/Reading/Sports tests today for the listed price above (for one test), or a discounted price of **\$60 for two tests. (Please circle which tests you would like to have done today).**
- No thank you, I would not like to have the tests done at this time.
